

## **JOB ADVERT**

---

### **Waste Supply Consultant**

#### **Competitive Salary**

#### **Knutsford, Cheshire**

Stopford Limited have an exciting opportunity for a Waste Supply Consultant to join the team within its consultancy group to support its renewable energy projects.

#### **The Company**

Stopford Limited is an International Energy and Environment Consultancy that provides innovative multidisciplinary solutions to a global market and holds an internationally recognised competence in waste to energy technologies.

With over 39 years of insight and practical experience across the Resource Recovery, Energy, Water & Wastewater, Transport and Aviation sectors, Stopford have been serving the requirements of a multinational client base from our team of industry leading experts.

Stopford's consultants bring together experts in health, safety and the environment having significant experience of ATC technologies, spanning incineration, gasification, pyrolysis and plasma gasification.

#### **The Benefits**

- Competitive Salary
- Pension
- 25 days holiday plus bank holidays
- Private medical insurance
- Employee assistance program
- On-site parking

#### **The Role**

The role will be to support the business in the following areas:

- Identification of waste plastic supplies in the UK. – The company is currently involved in a number of waste plastic to oil plants. The plants will take end of waste plastics (PP, HDPE, LDPE) and convert it back into oil. The role will require the individual to contact with waste plastic producers and suppliers to acquire the waste. Each plant will process circa 20,000 tonnes of waste per annum.
- Support Stopford's international projects (France, USA, Far East) with developing a knowledge of waste supply.
- Identification of End-of-Life Tyres Supplies in the UK – The company is currently involved in a project to convert EFL Tyres into oil and carbon black. The role will be to identify sources of EFL tyres in the UK.

- A knowledge of the private and local authority Waste management supply chain in the UK is highly desirable.
- For all projects, the individual should also have an understanding of the technologies used to process waste into feedstock. This should include MRF, Shredders, Conveyors, etc.
- The role will require travel to meet suppliers.
- An understanding of the commercial aspects of the waste management industry, including gate fee profiles for different streams is an essential skill for the role.
- The individual should have good communication skills, and presentation skills.
- The individual should be able to work well in a team.
- The individual must have a minimum of 10 years of experience in the waste industry.

#### **About you**

- Experience in waste plastic management industry,
- Understanding of the waste plastic supply chain,
- Good understanding of commercial aspects of the waste management industry,
- Ability to work within a team of multi-disciplinary engineers,
- Good report writing and presentation skills,
- Experience in trouble shooting.

Please note we do not accept applications from agencies, and you must be eligible to live and work in the UK.

To apply, please email your CV to [careers@stopford.co.uk](mailto:careers@stopford.co.uk) and quote job reference.
